

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1-14. (Canceled)

15. (Currently Amended) A method for controlling a barricade of a parking space for a vehicle, the method comprising the steps of:

controlling the barricade from the vehicle by a code transmitted using a radio signal, [[and]]

checking the code with regard to an authorization of the code, wherein the code is changed by an input, and a plurality of codes are recognized as authorized for one barricade;
and

logging a dwell time of the vehicle in the parking space.

16. (Previously Presented) The method according to claim 15, wherein:
the code is changeable using a password.

17. (Previously Presented) The method according to claim 15, wherein:
the radio signal is transmitted in accordance with Bluetooth.

18. (Canceled).

19. (Previously Presented) The method according to claim 15, wherein:
the code includes one of a personal identification number, an identification number of the vehicle, and an identification number of a radio module.

20. (Currently Amended) A device for controlling a barricade of a parking space for a vehicle, comprising:
a radio module;
a processor;

a memory storing a plurality of authorized codes; and

an actuating technology for controlling the barricade, wherein:

the device is controllable using an authorized code that is receivable from the radio module, [[and]]

each of the plurality of authorized codes is changeable using the processor,

the device is connectable to a computing arrangement, wherein the plurality of authorized codes in the memory are changeable using the computing arrangement, and

the computing arrangement logs a dwell time of the vehicle in the parking space.

21. (Previously Presented) The device according to claim 20, wherein:

the plurality of authorized codes in the memory are changeable using a password.

22. (Previously Presented) The device according to claim 20, wherein:

the radio module includes a Bluetooth module.

23. (Previously Presented) The device according to claim 20, wherein:

the barricade includes one of a garage door and a barrier.

24. (Canceled).

25. (Canceled).

26. (Currently Amended) A vehicle comprising:

a device that includes:

a radio module,

a processor connected to the radio module,

a signal processing element connected to the processor,

a display connected to the signal processing element, and

an input device connected to the signal processing element for receiving a code, wherein:

the code is transmittable to a device for controlling a barricade of a parking space for a vehicle and for logging a dwell time of the vehicle in the parking space.

27. (Previously Presented) The vehicle according to claim 26, wherein the radio module includes a Bluetooth module.

28. (Previously Presented) The vehicle according to claim 26, wherein:
the device is formed as a remote control.

29. (Previously Presented) The method according to claim 15, wherein the code is only changeable using a password.

30. (Previously Presented) The device of claim 20, wherein the code is only changeable using a password.

31. (Previously Presented) The vehicle of claim 26, wherein the code is only changeable using a password.
